Show the difference with this fun layout. Source: @fishmaninfourth 14. Keep it simple This one gets the message across and won't overwhelm students. Source: Upper Elementary Snapshots 15. What is theme? Determine examples of each theme with sticky notes. Source: Appletastic Learning Loving these theme anchor charts? Subscribe to our newsletters for more teacher content. Plus, check out tips for teaching theme. Deb Hanson Let's face it... teaching about themes in literature is hard! It's so difficult, in fact, that teachers don't seem to have a unified approach to teaching it. If you do a quick search on Pinterest, you will soon realize that there seem to be two approaches. Some teachers teach their students that the theme should be stated in one word (honesty, friendship, etc.), while other teachers stress that the theme should be stated in a complete sentence. I struggled with this for years, constantly second-guessing whether I was teaching it "right". I finally decided that I needed to choose an approach and be consistent. I chose to embrace the "complete sentence" philosophy because it appeared to best match my state's standards. Last year, I ran across this blog post by Bonnie of Presto Plans that made me feel more confident in my decision... but it also challenged my thinking a bit! I realized that I was guilty of confusing the MORAL of the story with the THEME at times. Bonnie has a fabulous chart that illustrates the differences between main idea, moral, topic, and theme. These words are often confused when teaching students about themes in literature. Now that you know a little about my "journey" with teaching theme, let me share a few of my favorite tips and activities for teaching upper elementary students about themes in literature! I use a PowerPoint lesson to introduce students to this analogy on Day 1 of my theme unit, and refer to it constantly. My students have always responded extremely well to it! This guiding question is the one that I have found works best: "What is the central idea or overall message that the author expects the reader to realize after finishing this story?" Also, allowing students to brainstorm the answer to this question with a partner can be extremely helpful when this topic is first introduced. Some students struggle with writing theme statements because they tend to be a bit abstract. Therefore, it's important to read many theme statements with students in order to get a "feel" for their abstract nature. Click on the following images to download these free posters! Notice that the word "selfishness" is underlined on the first poster. I point out to my students that any number of negative traits can be written in place of "selfishness". Therefore, these are a few more theme possibilities: Dishonesty can lead to negative consequences. Laziness can lead to negative consequences. Rude behavior can lead to negative consequences. My go-to author for this concept is Patricia Polacco! Her books are so beautifully written, and always contain a theme that is relatively easy to pick out! An A From Miss Keller: Facing challenges can help you grow. Challenges can be overcome with hard work and patience. Value your friendships. My Rotten Red-Headed Older Brother: Families face adversity together. Family members are there for you when life gets messy. Mrs. Katz and Tush: Friendship can come in forms you might not expect. Theme is a topic that you will be referring to throughout your school year. If you're like most upper elementary teachers, when you finish reading a book with students, you'll take a moment to decipher the book's theme(s). Therefore, it is helpful for many students to have some sort of tool they can reference. My favorite tools that allow for future reference are anchor charts and interactive notebook entries. Below, you will see my theme anchor chart. Teaching theme to 3rd grade, 4th grade, or 5th grade students is just plain HARD. Theme is an abstract idea, making it really hard for teachers to put into words and even harder for students to grasp. If your students are struggling with understanding theme, rest assured that they are not alone! Teachers all over the world have this same struggle. Teachers often teach theme by creating anchor charts that list common themes or that list questions students should ask themselves when trying to determine the theme of a passage or story. These are helpful and good strategies to use, but most students will still have no clue how to determine the theme independently just through the anchor charts. There are other strategies you can use to help scaffold student understanding. Students struggle with theme because it is unlike anything else they have learned in their ELA classroom. In order to identify the theme of a text, students must also have the ability to summarize important parts of a text so that they have a clear understanding of what an entire passage says. Students must be able to distinguish the theme from the main idea. They must understand what lesson the author is trying to teach and recognize that they can disagree with the author's point of view. They must have a solid grasp of story elements and how characters change. They must be able to make inferences. On top of all of that, students must understand how to actually determine the theme, which is a challenge in itself. No wonder teaching theme is so hard! Shorter texts allow for plenty of opportunities for you to model how to find the theme of a story, and plenty of opportunities for students to practice. Shorter texts keep students from being overwhelmed and getting frustrated. Shorter texts allow you to focus primarily on finding the theme, and less on decoding words and difficult vocabulary. Shorter texts make it easier for you to determine where your students are struggling and how to reteach. Shorter texts for practicing theme can be hard to find. Use this no prep theme freebie with short texts to help make your theme lesson planning easier. Shorter texts are simply a must have when introducing your students to theme. Often theme instruction is limited to explaining what theme is, providing examples of theme, and modeling to students how to find the theme of a story. But there are many aspects to theme that can be confusing for students. By teaching each of these in isolation, you can more easily figure out where your students are struggling. The aspects of theme that I have found confuse students the most - as well as ideas for teaching each aspect - are below. Themes aren't usually stated in the passage. To help students better understand this, have students read a paragraph with a clear theme. Tell students the theme of this paragraph, using a thinkaloud to explain how you figured it out. Go back and reread the passage, showing students that the theme was not stated anywhere in the passage. Completely different stories can have the same theme. Seeing the same theme played out with a variety of different characters and plots can really help students better understand how to determine the theme. Read several very different paragraphs, each with the same theme to students. This resource contains 16 different short stories, each with one of 4 themes, to make teaching this aspect of theme easy on you. Theme and main idea are different. This is essential for students to understand, but very hard to teach. To help students understand this, have them read a short passage with a clear theme. Then, write 5 statements - 3 details from the passage, the main idea of the passage, and the theme of the passage. Do not tell students what is what, but instead have them figure that out. Doing this activity repeatedly really helps solidify students' understanding of the difference between main idea and theme. If your students are still struggling with main idea, then this activity will also help them be better able to differentiate between main idea and details. (This is one of the most popular activities in my Teaching Theme Bundle.) You don't have to agree with the theme. This is particularly important in a world where biased information is available everywhere. Students need to know that they do not have to agree with everything they read. A good way to do this is to show students two paragraphs with opposing themes and have students discuss which theme they agree with more. For example, you could have a paragraph with the theme of "You can always trust your friends" and another paragraph with the theme of "If you want something done right, you have to do it yourself." A reading passage or text can have more than one theme. This can be confusing to students, as not all passages have more than one theme, while novels almost always do. Build up to determining the theme of novels by showing students shorter passages with at least two themes. Themes are meant to apply to real life. This is an important aspect of theme - themes are not just a lesson for the characters in a story. The author intends for people to learn from the theme of a story. To practice this, read short passages with clear themes and, after identifying the theme, ask students how they could apply it to their own life. (Or have them explain why they wouldn't want to apply it to their own life.) Download this cut and paste theme freebie here!
